

Announcement No. QTC69005

Subject: Environmental Policy

QTC Energy Public Company Limited places importance on conducting business with responsibility toward the environment and society in a sustainable manner. The Company recognizes that its business operations may cause both direct and indirect environmental impacts, which may adversely affect biodiversity as well as climate change. Therefore, the Company is committed to conducting environmentally friendly business by using resources efficiently, preventing pollution emissions and managing waste, protecting biodiversity, and reducing greenhouse gas emissions in order to move toward a low-carbon economy. The Company also promotes and develops employees' knowledge and understanding in every work process with responsibility, while providing support in various resources for management, including promoting understanding among business partners. The Company has therefore established this Environmental Policy for strict adherence and compliance until it becomes a green culture as follows:

1. Analyze, assess, and review impacts arising from business processes that may affect the environment, biodiversity, and climate change in a comprehensive manner.
2. Develop processes and products to be environmentally friendly in order to reduce impacts on the environment, biodiversity, pollution and waste generation, including climate change arising from the Company's processes or products.
3. Control and prevent various processes in compliance with standards, with emphasis on sustainable resource utilization, waste reduction in accordance with the 3Rs principle, pollution prevention at the source, improvement of energy efficiency, reduction of greenhouse gas emissions, and protection of biodiversity.
4. Communicate with executives and employees to ensure knowledge and understanding, in order to build awareness of the environment and biodiversity, as well as climate change, until it becomes a green culture.
5. Provide continuous support in terms of information, personnel, budget, and time for the implementation of projects or activities in order to achieve objectives and targets.
6. Give importance to listening to the voices of communities and relevant stakeholders in accordance with human rights principles, including various agencies in the Organization's development projects that may arise, in order to reduce impacts on ecosystems and relevant stakeholders.
7. Promote awareness among business partners of the importance of environmental matters through the procurement process.
8. Review environmental policy, objectives, and targets in order to achieve better improvement systematically and continuously.
9. Monitor, inspect, and continuously assess effectiveness to ensure compliance with objectives and targets, as well as with legal requirements and other related requirements.

This Environmental Policy has been published, documented, and communicated to all employees at every level of the Organization and to the Organization's stakeholders so that they are informed, understand it, and strictly adhere to and comply with it.

Announced on 21 January 2026
